

Printing Instructions:

This planner is laid out so that, when all the pages are assembled back to back, it can be folded in half and all the pages will be in order.

For best results: this planner can be printed on a two sided printer (short edge binding or in landscape mode) then folded together to make a booklet.

One sided printing: To print out properly on a printer that is not capable of two sided printing, print the first page and flip it to print the second page on the back of the first.

Your local print and copy center can print this out in order as well. If you're feeling fancy, you can print the cover on a piece of cardstock.

Nano Boston 2020 planner

Designed by Karla (pikagirl)

NaNoBoston

The NaNoBoston Planner is designed to help keep you on track during National Novel Writer's Month. It has target word counts, some checklists, and other ways to assist keeping you organized during the month of November.
